Acquisition Logistics Interface With Other Career Fields

- **BCF** – Critical Input for Life Cycle Cost estimates, O&S costs, supportability issues related to materiel release and fielding
- **Contracting** – Interface required to determine supportability inputs to the contract including Performance Based Logistics clauses, incentives, etc.
- **Info Technology** – Integrated Electronic Tech Manuals (IETM/ETM), Embedded Diagnostics/Prognostics, interoperability certifications, post deployment software support
- **Manufacturing/Production/QA** – Critical input regarding reliability/maintainability measures, facility requirements, etc.
- **Program Management** – essential tie to program management issues – logistics impacts over the development cycle and beyond

Acquisition Logistics Interface With Other Career Fields

- ***SPRDE*** - Critical design interface issues that ultimately determine the supportability and life cycle cost for the end item
- ***Test and Evaluation*** - Signatory on the TEMP, critical interface with ATEC evaluators and the Independent Logistician
